

Mining.

One of the richest strikes ever made in Park City was made on the American Flag Company's Thunderer ground on Saturday night last. On the 300-foot level ore is being mined which assays 2750 ounces in silver and 22 ounces gold per ton, making a total valuation of \$2000 per ton.

A large body of rich ore was opened this week in the original holdings of the Daly-Judge company at Park City on the Bannister claim, about 2400 feet southwest of the Daly-West end lines.

A report was received here this week by Secretary Page that six inches of fine chloride ore has appeared in the face of the tunnel being driven in a cross-fissure to a connection with the contact ledge which traverses the Lone Pine Company's claims in the Snake Creek mining district southwest of Park City. This is the property which was described in the columns of this paper two weeks ago, when it was predicted that ore values would be tapped within thirty days.

Charles Batre, a well-known Boston operator, accompanied by Colonel Treweek, president of the Wabash Company, has gone to Park City for the purpose of inspecting the Wabash and other Park City properties.

The Nephi Mining Company filed articles incorporating the company this week, with Nephi as its principal place of business. The company has a capital stock of \$20,000, divided into 400,000 shares at a par value of 5 cents each.

A strike is reported in the ground of the Four Metals Company in Dugway district, this side of Deep Creek. The ore taken from the new shaft at a depth of 30 feet assayed 59 ounces of silver and 67 per cent lead to the ton.

James T. Kessel, former superintendent of the Anchor mill at Park City, has been engaged as superintendent and manager of the Sheba mill in the Star district, Humboldt county, Nev. The equipment has been ordered for this plant, and Mr. Kessel has gone to the grounds to see that it is properly installed.

The Silver Shield Mining company, whose properties are at Bingham, has engaged John Driscoll, formerly with the U. S. Mining company, as superintendent. They have also purchased two power drills for use in their big tunnel, and work will be commenced as soon as the consignment of steel rails for use in the tunnel arrive from the East.

Articles incorporating the Belknap Mining company were filed this week, with Richfield as its principal place of business. The company has \$40,000 capital stock, divided into 400,000 shares with a par value of 10 cents per share. The officers of the company are W. C. Kennedy, president; Simon Larsen, vice-president; N. C. Christensen, secretary and treasurer, who together with George S. Smith and W. W. Harmon are directors.

All the buildings and power plant for the 500-ton sampling mill belonging to the Mackintosh company at Park City are completed, and the machinery is expected daily.

The management of the Creole Mining company in Park City has decided to equip the mine with a 60-horse-power hoist in order to sink the shaft to 1000 feet. Material for the new hoisting works and gallows frame have been ordered and a road to the property from Park City will be graded at once.

F. H. Lathrap, accompanied by a number of gentlemen who are interested in the ownership of the Wolverine Mining company, went to visit the great camp on Tuesday last and returned well pleased with the recent developments on their property. There is considerable Michigan money being put into Park City mining properties and the Easterners say that the great camp looks good to them.

Louis Bamberger, who has been visiting the Bamberger De La Mar mines in Nevada, reports that the changes made in tearing down the old equipment has been about completed and that work is being rushed to get things in shape at the big mine. He states that the ore bodies are looking better than ever and great results are expected from their workings during the remainder of the year.

The shaft of the New York Bonanza at Park City has been sunk to a depth of 100 feet in the past thirty days besides accomplishing a considerable amount of heavy grading and putting in surface improvements. The New York claim runs parallel to the Naildriver and is said to contain equally as high values as those contained in the latter claim.

Two new ore bodies which have all indications of permanency have been opened up in the Carls properties, the most important having been discovered on the ground of the Northern Spy where three feet of ore has been uncovered on the 600-foot level south which goes 15 per cent copper, sixty ounces in silver and \$2 in gold.

Jacob E. Bamberger, president of the Daly-West Mining company, has just returned from New York and other Eastern cities, where he has been engaged in business connected with his company for the past month.

Active operations will begin at once on the Paymaster claims adjoining the Utah and Eastern company's Dixie copper property, and with the previous development on this group of claims it is predicted that a smelter will soon be installed in the district for handling the copper output of these and other rich copper claims in the vicinity.
